# Our Passion – Quality Windows

---

Our quality comes from our passion – our passion comes from our principles. With a focus on exceptional quality, value, service, and options, our products can bring your architectural vision to life. Whether you are remodeling, building new, or renovating a historic building – we have products that will complement your design.

Since 1978, we have provided the Northwest with finely crafted wood windows and doors. From our factory in Burlington, Washington we strive to

bring a high-quality product to the industry built around the belief that craftsmanship and service should never be sacrificed. Our hands-on approach ensures that exceptional detail is put into every aspect of our products.

With a strong commitment to value, a solid reputation in the community, and over 45 years of experience manufacturing wood windows and doors – you can count on a consistent product delivered every time.

**02. PRODUCT DETAILS**

## It's In The Details

---

Our products begin with carefully selected components vertical grain douglas fir and cast bronze hardware on select products. We pride ourselves in putting some of the most advanced insulated glass and low-e coatings available in our windows. Many of our components are sourced

locally from companies here in the Northwest. Our extensive product line includes most types of operation and design, making the options endless. From traditional double-hung to bi-folding and lift & slide doors, we can do almost any opening, creating the feel that you desire.

## Clad Windows & Doors

Our clad windows join two unique materials in an innovative way that increases the resilience of our products. Vertical grain fir is indigenous to the Pacific Northwest and has earned its place as a favored standard thanks to its beauty, strength, and durability. Our clad frames and sashes have 0.94" extrusions with a standard Kynar® finish.

Stile can customize colors to emulate other manufacturers' colors, or you can choose your own for a truly custom look on both your windows and doors. Casement and picture frames maximize views by using the least amount of wood surrounding the glass.

- Lift & Slide
- Bifold
- Hinged

## Wood Windows & Doors

A look no other type of material can achieve. Wood is sustainable. Wood is beautiful. Wood offers versatility in design, allowing for custom dimensions and profiles, and can be painted or stained to achieve your preferred look.

Wooden windows come in a variety of types, each with its unique charm. With proper maintenance, wood windows can be remarkably durable and long-lasting.

## Retrofit Windows

These traditional-style wood windows are crafted to fit existing window openings with precision, ensuring a seamless frame-in-frame replacement. This method, known as insert window replacement, involves installing new windows within the existing frame while only removing the old sash, hardware, and covers.

Choosing insert window replacement means enjoying a quicker installation process that maintains the charm of your current window design. It's an excellent option when you are pleased with the size, shape, and operating style of your existing windows. By keeping your existing trim and siding undisturbed, we deliver a smooth and affordable upgrade to your home.

## Customized For You

---

Focusing on finer details is a part of every Stile window. Whether you are building new or enhancing an existing building, we have decorative options that get the details right. If you can't find what you are looking for in our standard product offering, we pride ourselves on our ability to customize. From glazing profiles to frame profiles

to types of operation, we have recreated historic windows and built modern ones. We provide multiple mulling options for creating multi-lite assemblies and offer a variety of glazing options to suit specific project needs. Our team can provide detailed drawings. We are confident we can make your project look just the way you want it to.

## Traditional

Cozy up to your window seat with a cup of coffee. Let the breeze flow by opening the top of your traditionally styled double-hung. Choose our traditional long bead interior detail with a bevel bead exterior to simulate the look of a traditional wood window. Choose from our retrofit products for replacing existing windows or our traditional-looking new windows for additions or complete window replacements. Add leaded glass or wood grids to complete the look.

## Contemporary

Sit down to a glass of wine and enjoy the view. Let the outside in with large sliding door panels effortlessly gliding out of the way. Choose our square interior detail and bevel bead exterior. On our casement windows, you can choose a narrow stile and rail. Mull them with direct glaze picture windows to complete the look. Add a lift & slide door and your visions of expansive views will come to life.
